

De Sales Preparatory Seminary
3501 South Lake Drive
Milwaukee, Wisconsin 53207

January 6, 1968

Dear Alan,

While this letter is not to be considered as final acceptance or rejection of your application for the seminary for September of next year, it is a notice to inform you (as the check below indicates) of the results of the Guidance-Placement Test you took at De Sales Preparatory Seminary.

The results of your test were satisfactory and indicate that you have the required mental qualifications.

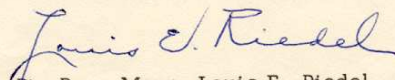

The results of your entrance test indicate that you will probably experience some difficulty with the seminary curriculum. As a result, we can accept you only on scholastic probation. With real determination and serious effort on your part, however, this note of probation can be removed by one successful year of seminary studies.

Your test results were not satisfactory. In fairness to you we could not accept your application for admission at this time because these tests definitely indicate you will find the seminary course too difficult. However, if you wish to see whether upon a second attempt you can meet the minimum standards of scholastic ability needed for college preparatory course, please call the seminary for further information as to dates and place. ~~In this case the usual fee for testing will be waived as a gesture of good will and encouragement on our part. If you wish to apply elsewhere, however, a refund of ten dollars will be sent you upon word from you.~~

Before closing, may we stress that this notification does not indicate a final acceptance, for this decision can only be made after all your papers have been received, evaluated, and properly processed. This notice is important for this reason, however, for it gives you your status on the entrance test. A final notice will be sent as soon as the Admissions Committee has cleared the foregoing details required for every applicant.

With blessings, we are

Sincerely yours in Christ

Rt. Rev. Msgr. Louis E. Riedel
Chairman, The Admissions Committee
